Work Experience

NatWest Group London, UK
GenAI Research Engineer July 2026–Present

- Managers: Maja Pantic, Stavros Petridis

Imperial College London London, UK
Research Associate in the iBUG group (leader: Maja Pantic) March 2025–July 2026

- I have mainly worked on advancing multimodal speech recognition (i.e., auditory/visual/audio-visual speech recognition) through the integration of Large Language Models (LLMs), with an emphasis on parameter-efficient, adaptive, and architectural design strategies. Most of these works stem from collaborations with Meta AI. I also worked on large-scale self-supervised audio pre-training via next-embedding autoregressive objectives (i.e., obtaining strong audio learners via causal pretraining in the embedding space) and elastic variable-frame-rate speech tokenizers.
- Key projects developed over the past two years:
  * **Llama-AVSR** [*IEEE ICASSP 2025*]
  * **Llama-SMoP** [*INTERSPEECH 2025*]
  * **Llama-Matryoshka** [*IEEE ASRU 2025*]
  * **MoME: Mixture of Matryoshka Experts** [*NeurIPS 2025*]
  * **Omni-AVSR** [*IEEE ICASSP 2026*]
  * **Attention Sinks and Massive Activations in AVSR** [*IEEE ICASSP 2026*]
  * **Dr. SHAP-AV** [*INTERSPEECH 2026*]
  * **VIB-AVSR** [*INTERSPEECH 2026*]
- Supervisor: Stavros Petridis (ICL/NatWest Group)

Imperial College London London, UK
Research Intern, *Audio-visual speech recognition meets LLMs* February 2024–November 2024
Supervisor: Stavros Petridis (ICL/Meta AI)

- I investigated the efficient integration of LLMs for the task of audio-visual speech recognition. This culminated in `Llama-AVSR`, a multimodal LLM with strong audio-visual speech recognition abilities. This work has been accepted at *ICASSP* 2025. More details here.

Jelinek Summer Workshop on Speech and Language Technology (JSALT) Le Mans, France
Junior researcher in the FST group June 2023–August 2023

- Junior researcher for the "*Finite state methods with modern neural Architectures for speech applications and beyond*" group at JSALT2023 in Le Mans, France. I worked on the integration of early-exit techniques to make the training and inference of CTC/MMI systems dynamical. This led to a publication at ICASSPW 2023.

Education

University of Trento Trento, Italy
Ph.D. in Information Engineering and Computer Science [with honours] Nov. 2021–Jan. 2025

- Title: *Efficient Knowledge Transfer and Adaptation for Speech and Beyond*
- Advisors: Daniele Falavigna, Alessio Brutti

– Research interests: continual learning for audio and speech processing; multi-modal (i.e., audio-language) continual learning; parameter-efficient transfer learning of audio/speech (e.g., Adapters, Mixture of Adapters, LoRA); multi-modal LLMs for audio-visual speech recognition. This led to 9 publications in top-notch conferences.

University of Padua Padua, Italy
MSc in Telecommunication Engineering [110/110 with honours] 2016–2019

– Advisors: Michele Rossi, Matteo Gadaleta
– Thesis Title: A Deep Learning-Based ECG Delineator: Evaluation and Comparison on Standard Databases

University of Padua Padua, Italy
BSc in Information Engineering 2013–2016

– Advisor: Nicola Laurenti
– Thesis Title: Message Authentication over an Ideal or Noisy Channel

Technical Skills

- **Speech & Audio:** Auditory speech recognition (ASR), audio-visual speech recognition (AVSR), audio/speech/audio-visual foundations models (Audio Spectrogram Transformers, Whisper/WavLM/HuBERT, AV-HuBERT), spoken language understanding, self-supervised audio/speech representation learning.
- **(Multimodal) Large Language Models:** Llama-based multimodal LLMs, parameter-efficient supervised fine-tuning (LoRA, adapters, soft mixture of adapters), preference-based post-training (DPO, GRPO).
- **ML Architectures/Paradigms:** Mixture of Experts (MoE), knowledge distillation, matryoshka representation learning, contrastive learning, continual learning, variational information bottleneck.
- **Large-Scale Training:** PyTorch, Pytorch Lightning, distributed training (DDP, FSDP), large-scale data processing.

Talks & Presentations

- "Parameter-Efficient Fine-tuning for Audio and Speech Processing." *Invited talk at the CUED Speech Group Seminars at the University of Cambridge* (April 2024).

Professional Services & Mentorship

Reviewer

- Conferences: NeurIPS, ICLR, ACMMM, ICASSP, Interspeech, IJCNN, IEEE MLSP, CVPR.
- Journals: IEEE Signal Processing Letters, Transactions on Audio, Speech and Language Processing, Neurocomputing, International Journal of Computer Vision, Transactions on Image Processing, Knowledge-based Systems.

Mentorship

- Jisoo Park [Chung-Ang University, PhD student][2026-active]: *Human-models visual benefit in AVSR; Looped Masked Autoencoders.*
- Hemansh Shridhar [2026-active]: *Looped Audio Language Models.*
- Anand [University of British Columbia/Imperial College London][2025-active]: *Attention sinks and massive activation in audio-visual LLMs, AVSR under visual noise perturbations.*
- Navlika Singh and Piyush Arora [Imperial College London, MSc students][2025/2026]: *Variational information bottleneck in LLM-based AVSR, Matryoshka neural codecs.*
- Salman Hussain Ali [Mila, Quebec-AI-Institute, MSc student][2025]: *Lightweight mamba-based adapters for parameter-efficient transfer learning in speech and audio.*

- Lidia Prokopovych [MIT, B.A. student][summer 2025]: *Robustness evaluation of Llama-AVSR under different acoustic and visual noise.*
- Stefano Ciapponi [University of Bologna, MSc student][summer 2023]: *Prompting techniques to parameter-efficiently fine-tune neural models for speech processing.*
